

PRINCE SONI

Software Engineer

☎ +91-8756635733 ✉ prince.princesoni.soni348@gmail.com  linkedin.com/in/princesoni

Summary

Software Engineer **3+ years of hands-on experience in Python automation** and growing expertise in Microsoft Azure. IIIT Bhopal graduate (2022) with practical experience in cloud services, automation, and building scalable, reliable solutions. Strong interest in cloud infrastructure, DevOps practices, and cost-efficient system design.

Skills

Programming & Querying: Java, SQL, Python, C++
framework : Springboot, Cucumber, Azure Cloud, CI/CD
Tools : Docker, VsCode, IntelliJ, MsExcel, MsWord

Experience

Software Engineer at CGI

Aug 2023 – Nov 2025

Test Automation Developer

Tools Used: Python, Cucumber, Azure

- Worked as a Test Automation Developer to automate testing scripts using the BDD.(Behavior-Driven Development) approach for validating application databases and data integrity.
- **Automated 100+** functional and regression test cases, reducing manual testing effort **by 90 percent** and improving release cycle efficiency.
- Automated regression and smoke test suites, reducing manual effort significantly.
- Integrated automation tests into **CI/CD pipelines** for continuous quality checks.
- Analyzed test failures, reported defects, and collaborated with developers for fixes.

Projects

Prakrtik | *Java, Spring Boot, Angular, SQL, Mongo db, Docker*

March 2022 – April 2023

- Developed backend services using Spring Boot with JPA/Hibernate ORM to perform complete CRUD operations on relational databases.
- Designed and implemented a microservices architecture using Spring Boot, enabling scalable and modular service deployment.
- Developed and deployed multiple independent microservices, ensuring loose coupling and improving overall system flexibility and maintainability
- Integrated with Eureka (service registry)
- Developed Dockerfiles for each microservice, containerizing Spring Boot applications with efficient multi-stage builds to minimize image size.

Price-Prediction MLmodel | *python, pandas, scikit-learn, matplotlib*

Nov 2020 – Feb 2021

- Developed a price prediction model using Python, implementing machine learning algorithms like Linear Regression to predict future prices based on historical data.
- Trained the model on a real-world dataset (e.g., housing prices, stock prices, product prices), cleaning and preprocessing data using Pandas and NumPy for accuracy.

Awards & Certifications

- **Ranked 102nd out of 49,000** participants in a HackerEarth contest. (**Profile**)
- **Recognized with LeetCode 500 Days of Coding and 500+ problem solved** Badge for long-term consistency in problem solving. (**Profile**)

Education

Bachelor of Technology in Computer Science Engineering (CSE)

Graduated: 2022

IIIT Bhopal

CGPA: 7.78 / 10
